ABOUT

I am a **software engineer** based in **Limerick**, completing an **MSc in Software Engineering** at UL, with hands-on experience building and maintaining web applications in **structured, collaborative** development environments. Alongside my technical background, I am an **experienced primary school teacher**, bringing strong communication, collaboration, organisation and problem-solving skills developed in a **professional** education environment. I am seeking a **graduate role** where I can **combine** these **transferable** skills with my software development experience, contribute to well-designed systems, and continue **growing** as a software engineer.

EDUCATION

University of Limerick, Limerick <i>Master of Science in Software Engineering (QQI Level 9)</i>	2026-Present
National College of Ireland, Dublin <i>Higher Diploma in Science in Computing (Software Development) (QQI Level 8)</i> Graduated with a 1.1 grade.	2023 - 2025
Hibernia College, Dublin <i>Professional Master of Education in Primary School Teaching (QQI Level 9)</i> Achieved 1.1 school placement grades and a 2.1 overall.	2019 - 2021
University of Limerick, Limerick <i>Bachelor of Arts in Political Science and International Relations and Sociology (QQI Level 8)</i> Graduated with a 2.1 grade.	2015- 2019

WORK EXPERIENCE

Basesite (https://www.basesite.com/) <i>Junior Software Developer Internship</i> - Full-Stack Development: Built and delivered feature enhancements for FacilityConnect, developing Angular components with TypeScript and PrimeNG while integrating RESTful APIs with a .NET/C# backend. - Performance Checks and User Experience: Created performance monitoring dashboards that used real-time analysis and metrics. Also involved building user testing frameworks to improve workflows and user experience. - Collaboration: Contributed to shared GitHub repositories through pull requests and code reviews. Also assisted with resolving merge conflicts, maintaining code quality with SonarCloud, and separation of concerns/clean architecture. - Continuous Professional Development: Participated in daily standups, supported ISO 27001 certification, documented decisions on Confluence, and completed CPD training through Zoho/Dometrain/Coursera. - Modern Development Practices: Used AI-assisted development tools (i.e. Cursor AI, GitHub Copilot) to improve development and uphold efficiency, debugging, and code.	June 2025 – January 2026
Department of Education and Youth (https://www.gov.ie/en/organisation/department-of-education/) <i>Primary School Teacher (Full-time, permanent)</i> - Teaching and Delivering Curriculum: This involved planning, preparing and marking lessons/assignments. - Professional and Parental Collaboration: Collaborating with staff, parents, and external professionals to support learning and behaviour. - Teamwork and Upholding Ethos: Attending staff meetings and fostering school-community relationships. - Classroom and School Management: This involved managing classroom activities, maintaining discipline, and ensuring safety during school hours and events.	September 2021 - Present

- **Pupil Development and Assessment:** Recording, assessing and reporting on the progress of pupils while also ensuring specific educational needs were met.

Leavys Shoes, 113 O'Connell Street, Limerick (www.leavysshoes.com)

January 2013 – December 2022

Sales Associate and Keyholder

- **Website and Social Media:** Involved maintaining and updating business website and managing social media presence by publishing digital content and promoting products.

- **Stock and Financial Management:** Conducted stock checks, processed payments, and end-of-day records.

- **Customer Service:** Helped customers select products, answered queries and resolved issues.

TECHNICAL SKILLS AND CORE COMPETENCIES

Programming Languages:	Java, C#, Python, PHP, Typescript, JavaScript, Go
Libraries and Frameworks:	Angular, React, Maven, Node.js, Spring Boot, Django, SCSS, Tailwind
Tools and Platforms:	Git, REST, TCP/IP, pgAdmin 4, Jira, Swagger, AWS, Figma, XAMPP, Visual Paradigm, Oracle Box
DBMS:	PostgreSQL, MySQL, SQLite
Development Environments and IDEs:	VSC, Cursor AI, IntelliJ, Eclipse, PopSQL, Brackets, Apache NetBeans
Core Competencies:	Full-Stack Development, Cloud Computing/DevOps, API Design/Integration, CI/CD, Technical Writing, UML, Software Testing and Deployment, Quality Assurance, Virtualisation

PROJECTS

- **Lineage:** This is a prototype for an internal **garment archive and lookbook** that would be for a fashion design house. With this app, the user can **track** garments, versions, lookbooks and notes in one place. This is very **useful** for ateliers and creative teams who might need a single location for organising and showcasing design development, and auditable history when they are designing clothes, shoes, etc. (<https://github.com/thomasleavy/lineage>)

Technologies used: Next.js, React, TypeScript, tRPC, Prisma, PostgreSQL, Docker, GitHub Actions, Vitest, and Argon2.

- **CivicFix:** This is a prototype **civic engagement app** that allows citizens to report **local issues and suggestions** via map-based submissions, case tracking, and optional public sharing — empowering direct democracy. (<https://github.com/thomasleavy/civic-fix>)

Technologies used: React, TypeScript, Vite, React Router, React Hook Form, Tailwind CSS, Node.js, Express, PostgreSQL, JWT, Multer, Nodemailer, and ReCAPTCHA, weather and news APIs

- **Home Pilot:** This is a **mobile-first smart home control app** for heating, hot water, lights, and real-time usage insights — all in one dashboard. (<https://github.com/thomasleavy/home-pilot>)

Technologies used: Angular, Node.js, Express, MQTT, WebSocket and Eclipse Mosquitto.

- **Primary Pals e-Learning Platform:** This final year project is a **full-stack e-learning application** for primary school pupils and teachers. It has features like user registration, role-based login, quiz taking and creating, avatar selection with unlockable features, statistics tracking, data gathering for teachers, and teacher management of associated pupils (<https://github.com/thomasleavy/eLearningApplication>).

Technologies used: React, Java, Spring Boot, BCrypt, PostgreSQL, pgAdmin 4 and Maven.
